The Weatherization Assistance program provides funds to install measures that reduce residential heating and cooling costs for low-income families and enhance the health and safety of residents. The program provides repairs and improvements to home heating and cooling systems and provides for the installation of energy-saving measures in the house, such as insulation and air sealing. The goal of the program is to increase the energy efficiency of housing occupied by low-income persons and reduce their total residential energy expenditures. This program does not offer assistance with paying utility bills.

Eligibility

For Weatherization Service Providers:

Nonprofit organizations and local governments are eligible to apply as providers of weatherization services to income-eligible households within defined geographic service areas (locality or localities). Application periods seeking new or continuing providers will be announced periodically.

For Persons Seeking Services:

Persons seeking more information on qualifying and applying for weatherization services must contact the local agency serving the city or county in which they live. A list of providers is located in the [Weatherization Providers Listing](#). DHCD does not provide application forms or accept applications directly.
